# WE ARE HERE TO HELP

Learning SPACE has been creating sensory spaces since 2007, providing a completely unique sensory experience and specialist provisions to those who seek it.

In this catalogue you will find a range of sensory equipment and structures designed with all sensory needs in mind. All of our sensory rooms are built to enable the user to relax, unwind and have fun in a safe and enriching environment - exactly what is needed in many situations

Whether you are creating a new room and would like some inspiration, or adding to a current space and wish to expand your growing sensory room - we are here to help you along this journey.

## Our Story

Learning SPACE was set up in 2007, by sisters Lorraine (teacher) and Mary (social worker). They felt parents, teachers, therapists and especially children deserved better when it came to accessing resources and sharing of knowledge, hence Learning SPACE was born. The main spark came from supporting their amazing sister, Emma, who has Soto Syndrome.

## Our Team

Our dedicated team of advisors are highly skilled in this field and come with a wealth of experience and qualifications. From teaching and social services experience to real life experience supporting family members with special educational needs or indeed have a special educational need themselves. They are passionate and driven to make a positive impact on children's lives.

Have fun exploring our  
website for a wider range!

# Our Process

## Step 1: Arrange a Meeting

We begin with an initial consultation to understand your specific needs and requirements for the sensory room. Contact us to schedule a meeting at your convenience. This is a vital step to ensure we capture all your expectations and tailor the space to meet the unique needs of your users.

Bespoke  
Plan Creation

## Step 2: Bespoke Plan Creation

Based on our discussion, our expert designers will create a bespoke plan for your sensory room. This includes detailed CAD drawings and a comprehensive quotation. Our plans are tailored to optimise the space and include a variety of sensory elements to stimulate and engage all senses.

## Step 3: Review and Amend

Once the plan and quotation are ready, we will review them with you. This is your opportunity to suggest any amendments or changes. We ensure that the final plan aligns perfectly with your vision and meets all your requirements.

## Step 4: Installation

Upon approval of the final plan, we will schedule the installation on a date that suits you. Our professional team will handle everything, ensuring a smooth and efficient setup process. We aim to cause minimal disruption and ensure the highest quality installation.

## Step 5: Training and Documentation

After installation, we provide comprehensive training on how to use and maintain the sensory room. You will receive full documentation that includes detailed instructions and tips to get the best out of your new sensory environment. We are committed to ensuring you feel confident and equipped to use the sensory room to its fullest potential.

## Sensory Room Bubble Tube Essentials Set

Product code: LSSREX

£114.99 incl. VAT

£95.83 excl. VAT

- BCB Liquid
- Brush
- Motorised Pump

Build your interactive sensory room using Connect Pro Sensory range where every piece of equipment can change colour at the same time when used with an Oval Controller or Cube Controller. Only one controller is needed to change all colours of connect pro items at the same time. Two added exclusive elements of the oval controller are:

1. You can colour mix e.g yellow and blue = green
2. All Connect Pro items can dance to music or react to voice as the oval controller is sound reactive.

**learning  
SPACE**

Colour options  
available

**LSCORNER2**

**£5,400.00 incl. VAT**

**£4,500.00 excl. VAT**

A completely unique item from Learning SPACE. This is a ready to go, slot into place, softplay corner thats perfect for any sensory space or setting.

The set comes as standard in the aqua and purple colours shown in the image but other colours are available for an additional cost.

Containing 3 large colourful padded plinths creating a soft seating area, 2 soft wall pads for extra comfort and 1 floor pad to make the usable space even larger, this set is sure to catch your eye.

We have also included a 1.2m bubble tube as standard but this can be substituted for a 1.8m or colour column upon request (for an additional charge)

There are also 2m x 150 fibre optics along with a colour changing light source. All items are controlled via the Connect Pro Oval controller which will change the colour of the fibre optics, as well as the bubble tube, making this a fully interactive experience.

Extra accessories include a telescopic brush for cleaning, bcb liquid for water maintenance and a pump for filling and emptying.

1800mm x 1800mm on the two sides with the plinth height at 400mm and the plinth depth at 900mm.

## Multi Function Aroma Diffuser Lamp

Transform your sensory space into a calming oasis with the Multi-Function Aroma Diffuser Lamp. This innovative device combines the power of colour-changing lights, soothing sounds, and calming fragrances to create the ultimate sensory experience. Ideal for use in sensory rooms, classrooms, or homes, this diffuser helps engage children's visual, auditory, and olfactory senses, supporting sensory development and relaxation. The gentle, colourful lights cycle through seven soothing colours, while the built-in Bluetooth speaker lets you control music or ambient sounds with ease, making it a fantastic tool for both play and relaxation.

Product Code: AD100B

## Colour Changing Aroma Diffuser with Bluetooth Speakers

This Colour Changing Aroma Diffuser Speaker certainly can bring life to any Sensory Room or even to your next party! It also serves as a Speaker System and is compatible to Android and iPhone wirelessly through Bluetooth. You can fill up the Diffuser Tank with liquid fragrance and the device will disperse it in the air at intervals. Features: -Compatible with Android and Apple devices via Bluetooth -Fragrance dispersal -Colour changing LED Lights -Perfect for Sensory Room or even a Party.

## Taughmonagh Primary School

Our school collaborated with Learning Space to develop an outdoor sensory pathway and interactive activity area. Lorraine and Barbara worked closely with us to develop our ideas and ensure we got exactly what we envisaged, in order to meet the needs of our pupils. Learning Space were careful not to rush the project to enable them to source appropriate, sustainable outdoor materials and resources. The completed area is exciting and vibrant, allowing the children to engage their senses, regulate their emotions and have fun. We are delighted with the outcome and look forward to working with Learning Space again in the future.

Louisa Wilson

Our amazing sensory paths are a series of guided movements for children to follow, shown by pictures and graphic images for both the ground and walls. As the students follow the path and complete the movements, they work off excess energy and develop their gross motor skills. The Learning Space Path also incorporates a sensory experience, helping to develop and encourage not only breathing techniques, pause methods but also mindful thinking.
